

DAMMANN
Barriers for safety

**32 YEARS OF EXPERTISE
IN BARRIERS**

Company profile

For over three decades, DAMMANN has been synonymous with professional, practical, and high-performance barrier solutions for national and international events. What began in 1994 as a company specializing in barriers is now an independent full-service provider for events of all sizes.

DAMMANN stands for quality, safety, and adherence to deadlines—not as a promise, but as a way of life. Event organizers, local authorities, government agencies, and agencies trust in our experience, our expertise, and our ability to implement even complex projects efficiently and reliably.

Our claim

Different locations, visitor flows, security requirements, and official regulations call for customized concepts. DAMMANN develops tailor-made barrier and security solutions that are precisely tailored to the respective situation.

Our claim deliberately goes beyond the mere provision of materials. We see ourselves as a comprehensive service provider and reliable partner—from personal consultation and structured planning to professional on-site assembly and dismantling. We always keep the big picture in mind: safety, functionality, cost-effectiveness, and smooth operation.

Performance

With more than 800,000 meters of movable barrier material and its own rental pool of over 180,000 meters of mobile fences and barrier fences, DAMMANN has exceptional capabilities.

Our own fleet of 12 trucks, supplemented by 10 modern portable forklifts, as well as well-coordinated assembly and logistics teams form the basis for precise, punctual, and smooth processes—even with tight time frames and demanding conditions.

Customized barrier solutions

DAMMANN offers a wide range of modern barrier and security systems. Thanks to high material availability, we guarantee delivery at all times and maximum independence from external sources of supply.

Key areas of expertise:

- Temporary fencing systems for festivals and large events
- Barriers for sporting events and public events
- High-quality VIP and special area barriers
- Stadium security and entrance and access control systems
- Privacy screens, guidance and crowd control systems

Planning, setup and dismantling

An experienced team of 15 permanent employees and well-coordinated crews of freelancers take care of the complete assembly and dismantling of all barriers – professionally, efficiently, and on time.

We provide support right from the project preparation stage, helping to draw up schedules, deployment plans, and timetables, and to develop sound barrier and security concepts. In close coordination with event organizers, security services, and authorities, we develop solutions that meet the highest safety standards while remaining practical.

Transportation & Logistics

Our own logistics ensure flexibility, adherence to deadlines, and security. Even in the event of last-minute changes, we respond quickly, reliably, and in a solution-oriented manner.

Certified traffic barriers in accordance with StVO (German Road Traffic Regulations)

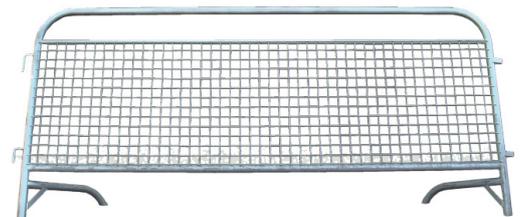

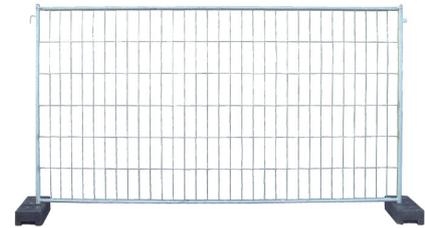

DAMMANN implements traffic and event barriers in full compliance with applicable legal regulations and recognized standards RSA 21, MVAS 99, and ZTV-SA 97—from planning and regulatory approval to professional installation and dismantling.

With over 3,500 products, we offer the right solution for every traffic and safety requirement.

Product range (selection)

Warehouses & Locations

A close-knit network of warehouse locations in Germany and throughout Europe enables reliable, on-time supply for events and construction projects of all sizes.

The strategic proximity of our warehouses to event venues and construction sites ensures short transport routes, high delivery reliability, and maximum flexibility—even with tight time frames, changing project phases, or last-minute changes.

Materials are delivered directly to the site of use as needed. This allows us to avoid downtime, optimize processes, and make a decisive contribution to the cost-effectiveness and schedule reliability of projects.

References – Major projects (selection)

- **Cycling World Championships Innsbruck / Austria**
41,000 m of barrier fencing, assembly and dismantling in 10 hours each

Your advantages at a glance

- **Experience that creates security**
Many years of practice, proven quality standards, and extensive experience with large-scale events involving security considerations.
- **Customized solutions instead of standard products**
Customized concepts, precisely tailored to the requirements of your project.
- **Everything from a single source**
Consulting, planning, sales or rental, transport, and professional assembly and disassembly—all fully coordinated.
- **Maximum reliability**
Our own modern fleet of vehicles, high material availability, and on-time implementation.
- **Flexible, fast, accessible**
Short response times, 24-hour availability, and confident handling of last-minute changes.
- **Professional implementation on site**
Experienced, trained installation teams with extensive event experience.
- **Clear processes, clear costs**
Transparent planning, dedicated contact persons, and comprehensible calculations.
- **Strong in coordination**
Close, experienced cooperation with authorities, event organizers, and construction managers.

"I look forward to providing personal, competent, and reliable support for your project."
